

"When safety, function and comfort are the top priorities"

R7 RESCUE

The ultimate search and rescue, SAR suit.

The R7 RESCUE concept was developed together with Swedish Sea Rescue Society, SSRS. This resulted in a safe, comfortable and practical suit, anatomically designed with no restraints during active work. The waterproof and breathable Quad-Lam fabric has a top layer of 330 D Cordura to ensure good durability. The protected front TIZIP Master Seal 10 zipper is more flexible and easier to open and close than conventional zippers. The telescope torso enables good fit for different bodysizes and the suit is equipped with comfortable superstretch glideskin neoprene seals at neck and wrists. Knees and elbows are padded and covered with an extra layer of heavy duty Cordura fabric. Double convertible pockets on the thighs and low profile internal pockets on the arms to ensure good storage possibilities. The lightweight neoprene softboots enhance grip, control and comfort.

Available sizes:

XS, S, M, ML, L, XL, XXL

- Breathable Cordura fabric
- Active ergonomic design
- Superstretch glideskin seals
- Cordura reinforced
- Telescope torso
- Expandable leg pockets
- Long arm pockets
- Tizip dryzipper
- Softboots
- Reflectors

Art no: 450

FEATURES AND DETAILS

BREATHABLE
4-layer waterproof and breathable lamination with a strong Cordura 330 D outer layer. 25000mm H₂O, 8000 cm³/m²/24h.

SUPERSTRETCH NECKSEAL
Very flexible, warm and comfortable neckseal in superstretch Glideskin Neoprene. Less friction due to the glideskin surface.

CORDURA REINFORCEMENTS
Seat, elbows and knees are reinforced with an extra layer of hardcore 500D Cordura fabric. Knees and elbows are also padded.

SUPERSTRETCH WRISTSEALS
Very flexible, warm and comfortable wristseals keeps your arms dry and warm. Less friction due to the Glideskin surface.

HIGH VISIBILITY
Reflective areas on all the important places.

TI-ZIP DRYZIPPER
Very light and flexible dryzipper from TI-ZIP. Protected by a zipper cover.

DUAL CONVERTIBLE POCKETS
Allow easy selection of huge capacity or slim profile based upon your need.

XLITE FLEXBOOT
Comfortable and light weight Flexboot in Neoprene for good grip and control.

ARM POCKETS
Low profile internal pockets located at the front of both arms for easy access.

MESH BAG
Light weight bag with mesh bottom for easy carrying.
